PROFESSIONAL SUMMARY

Motivated and detail-oriented IT graduate with hands-on experience in developing responsive websites and basic web and mobile applications for Android and iOS through academic and personal projects. Possesses strong foundational knowledge in both front-end and back-end development, with a passion for continuous learning, problem-solving, and contributing effectively within collaborative development teams.

WORK EXPERIENCE San Fernando Hospital, Inc Jan 2025 – Jul 2025

IT Support Staff

Brgy. Dolores, CSFP

- Provided onsite technical support to 20+ end users for Windows OS, Microsoft Office, printers and peripherals, handling hardware, software and network issues via phone line.
- Diagnosed and resolved desktop/laptop failures, application errors, driver/printer problems, and basic network connectivity issues to avoid delayed actual operations.
- Installed, configured, imaged and deployed operating systems, hospital systems (HIS, MMS, HRIS) and peripherals; managed user accounts and access.
- Performed routine system updates, security patches, backups and preventive maintenance to maintain system availability and performance.
- Monitored system and network performance, escalated complex incidents, and documented troubleshooting steps and resolutions for the knowledge base.
- Trained end-users on common issues and best practices and collaborated closely with the IT team to prioritize and resolve onsite requests.

Floridablanca Doctor's Hospital, Inc

Mar 2024 – Jun 2024

Technical Support Intern

Brgy. Valdez, Floridablanca, Pampanga

- Assisted in troubleshooting and maintaining hospital IT infrastructure, ensuring reliable operation of critical systems.
- Gained experience in installing computer programs (HIMS, Adobe Acrobat, MS Office) to support daily hospital operations.
- Supported the installation and configuration of new hardware, contributing to enhanced patient care services.
- Participated in team meetings to prioritize tasks and improve IT processes in a fast-paced environment.
- Contributed to troubleshooting efforts, leading to a reduction in recurring technical issues.

PROJECTS Property Rental Management System (Capstone Project)

January 2024 - February 2026

Full Stack Developer

<https://github.com/ProgJosh>

- Developed a web-based property rental system using PHP and Laravel, enhancing user experience for tenants and landlords.
- Implemented authentication for tenants, landlords, and admin users, ensuring secure access.
- Designed and managed a MySQL database, supporting property listings and transactional features.

Inventory Management System

Full Stack Developer

- Developed a web-based inventory management system for small and medium-sized businesses to track products, stock levels, suppliers, and inventory movements.
- Implemented CRUD features, search and filtering, and low-stock monitoring to improve inventory accuracy and streamline day-to-day operations.
