EMMANUEL JOSH VELO

Full-Stack Web Developer

Lubao, Pampanga, Philippines | +63 975 216 2057 | veloemmanueljosh15@gmail.com
Portfolio: progjosh.github.io/emmanuel-velo-portfolio | GitHub: github.com/ProgJosh

PROFESSIONAL SUMMARY

Full-stack web developer and BS Information Technology graduate who builds responsive, well-structured web applications with React, Next.js, TypeScript, Laravel, NestJS, MySQL, and PostgreSQL. Delivers freelance client projects from requirements to deployment, including a live investment operations platform with a double-entry ledger and automated tests. Backed by hands-on hospital IT support experience in troubleshooting, system deployment, and user support, and uses AI-assisted development tools daily to build, debug, and test efficiently.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, SQL, HTML5, CSS3
Frontend: React, Next.js, Tailwind CSS, Bootstrap, Livewire, Vite, React Router, Responsive Web Design
Backend: Laravel, NestJS, Node.js, REST APIs, Authentication, Role-Based Access Control
Databases: MySQL, PostgreSQL, Prisma ORM, phpMyAdmin
Testing and DevOps: Git, GitHub, Vitest, Testing Library, Docker, Vercel, Render, Web Hosting
Integrations and Web: Stripe API, WordPress, SEO, Google Analytics
AI-Assisted Development: Claude Code, OpenAI Codex, ChatGPT, Amazon Q, OpenCode
Professional: Debugging, Technical Documentation, End-User Training, Team Collaboration, Task Management

WORK EXPERIENCE

Freelance Full-Stack Developer **2026 – Present**
Self-Employed *Remote*

- Build web applications and software for local and international clients, handling requirements, development, deployment, and handover.
- **Vertex Legacy** (client thesis project; Next.js, TypeScript, NestJS, PostgreSQL): Built the responsive public site and the application architecture behind investor, finance, and admin workflows, including a NestJS API, Prisma data model, and double-entry ledger with traceable reversals.
- Wrote automated tests and provider adapters for Vertex Legacy, and kept payment, payout, and identity integrations gated behind documented sandbox flows; the public site is live.
- **BakeSmart 2D** (client thesis project): Developed a 2D educational bread-baking game prototype that passed the client's thesis defense; now expanding it into a full game with a story mode for Windows and Android.

IT Support Staff **Jan 2025 – Jul 2025**
San Fernando Hospital, Inc. *City of San Fernando, Pampanga*

- Provided onsite and phone technical support to 20+ end users for Windows, Microsoft Office, printers, peripherals, and network connectivity.
- Diagnosed and resolved hardware failures, application errors, driver and printer issues, and network problems to minimize disruption to hospital operations.
- Installed, imaged, and configured workstations and hospital systems (HIS, MMS, HRIS); managed user accounts and access permissions.
- Applied system updates, security patches, backups, and preventive maintenance to keep systems available and performing well.
- Documented troubleshooting steps for the IT knowledge base, escalated complex incidents, and trained staff on common issues and best practices.

Technical Support Intern **Mar 2024 – Jun 2024**
Floridablanca Doctor's Hospital, Inc. *Floridablanca, Pampanga*

- Troubleshot and maintained hospital IT infrastructure to keep critical systems running reliably.
- Installed and configured software (HIMS, Adobe Acrobat, Microsoft Office) and new hardware supporting daily hospital operations.
- Worked with the IT team to prioritize tasks and helped reduce recurring technical issues.

PROJECTS

Properties Management Portal (Capstone Project) **2024 – 2026**
Full-Stack Developer | Laravel, PHP, MySQL, Livewire, Tailwind CSS, Stripe

- Built a full-stack rental platform for apartments around Guagua, Pampanga that connects property listings, bookings, payments, tenant records, and lease agreements.
- Implemented role-based access for tenants, landlords, and admins with Laravel Jetstream, plus Stripe payments, payment history, and automated email reminders.
- Designed the MySQL database and structured the Laravel 11 backend with MVC, service classes, and policies; deployed with Docker on Render.

Inventory Management System **Sep 2026**
Frontend Developer | React, TypeScript, Tailwind CSS, Vitest

- Built a browser-based inventory application for small and medium businesses with role-based dashboards for admin, manager, and staff users.
- Implemented product, supplier, and category management, stock-in and stock-out transactions with negative-stock and duplicate-SKU protection, and automatic low-stock alerts.
- Added searchable transaction history, CSV report export, and a user-attributed audit log; tested with Vitest and Testing Library.

NexaCart Marketplace Storefront **Sep 2026**
Frontend Developer | React, TypeScript, Vite, Tailwind CSS, Recharts

- Built a Philippine marketplace storefront with catalog search, filtering, product variants, a wishlist, a cart, and a validated three-step checkout.
- Built an admin dashboard for managing the catalog, inventory, promotions, and order status, with sales charts and CSV report export.

EDUCATION

Bachelor of Science in Information Technology **2020 – 2024**
Mary the Queen College of Pampanga, Inc.
